

HENRY GEORGE WARM.

Reaches Out for Some of the Tenement-House Reformers.

Single-Tax Ideas the Only Remedy and Cure for Poverty.

A Bill on These Lines to Go to the Legislature at Once.

New York Socialists and single-tax reformers are talking to-day about Henry George's great speech at Chickering Hall last night, on the much-mooted question of tenement-house reform, and the proper means of abolishing the evils of the existing system.

There was a big audience, and, judging from the frequent and enthusiastic applause with which they interrupted the orator, they were in cordial sympathy with his views. The meeting had been called by Mr. George and his friends to combat the theories of tenement-house reform advanced by the Social Reform Union at its recent Cooper Union meeting. Prof. Felix Adler and Seligman and Richard Watson Gilder and Dr. W. S. Rainsford, the leaders of the organization, had been invited to meet Mr. George and discuss the question in open debate.

They did not appear, however, so the distinguished single-tax reformer had the field to himself. He was backed up in his opinions by Congressman Tom L. Johnson, of Ohio, who was present. According to Mr. George, the gentlemen of the Social Reform Union did not know what they were talking about when they laid down their twenty-one propositions for preventing the overcrowding of tenement-houses, the greatest social distress. None of them, he declared, went to the root of the question, which was, how to abolish poverty. The only real solution of the problem, he said, was as a panacea for these evils was the adoption of the single-tax principle. He spoke for nearly two hours to show that Prof. Adler and Mr. Gilder were all wrong in their views as to what the present situation demanded in the way of reform legislation.

He called them milk-and-water Socialists, and said he could only treat with contempt the pety-peasant-like party line with which they proposed in the way of charity organizations and charity bails and fairs, charity woodways and charity living houses.

In settling immigration, he argued, would accomplish nothing. What was needed was the abolition of monopoly and the removal of the rich by increasing the taxes of the rich landowners.

It would be useless to put up finer, handsomer buildings, because the rich would buy them, and the poor would be left to live in them, and more than they could afford.
